

# Abhishek Agrawal

abhi7825agrawal@gmail.com — 7611801233 — LinkedIn Profile

## EDUCATION

---

- **Jaipur National University**, Jaipur 2025 – Present  
MCA
- **St. Wilfred's P.G. College**, Jaipur 2023 – 2025  
BCA — 75%

## EXPERIENCE

---

- **Content Management Executive**, Gaj By Gaj Colonizers Oct 2024
  - Managed and optimized social media platforms for marketing campaigns.
  - Created content strategies that improved engagement and reach.
- **Cyber Security Intern**, Rajasthan Police May 2026
  - Developed various OSINT tools used to detect breach data of particulars.
  - Build tools to solve real life cases related to cyber fraud.

## PROJECTS

---

- **GYANI-AI** — Developed a modular AI platform integrating multiple utilities and tools into a single interface. Designed for scalability with continuous feature expansion and automation workflows.
- **MOSSINT-ALIKE** — Built an OSINT-based intelligence tool for email investigation, breach detection, and metadata extraction. Integrated multiple public data sources for enhanced analysis.
- **Upi Fraud Analyzer** — Built an UPI fraud analyzer in which the backend totally works on python and the frontend on HTML, CSS, JS.
- **Smart-FIR** — Created an AI-powered system to generate structured FIR reports from raw user input, improving documentation efficiency and reducing manual errors.
- **Fact-Gard** — Developed a fake news detection system that analyzes URLs, media content, and metadata to identify misinformation patterns.
- **CallTrace Pro** — Engineered a privacy-focused application for analyzing CDR/IPDR data locally, ensuring sensitive information is processed securely without external exposure.
- **Live-Track** — Built a real-time tracking system using secure room-code based session matching, enabling controlled and temporary location sharing.
- **JARVIS-X** — Designed a voice-controlled assistant capable of performing automation tasks, web operations, and intelligent document analysis using speech processing.
- **SHORTS-MAKER** — Developed a web application that converts long-form YouTube videos into AI-generated short-form content using automated clipping logic.
- **Origin-Trace** — Built a reverse tracing tool to identify the original source of widely circulated images using pattern matching and search techniques.
- **PLAGIARISM-DETECTION** — Implemented a plagiarism detection system for textual data using similarity analysis and content comparison algorithms.
- **PORTFOLIO** — Designed and deployed a personal portfolio website showcasing technical projects, certifications, and skills with responsive UI.
- **Web-Monitoring** — Developed a full-stack threat intelligence system utilizing Machine Learning to detect malicious websites, generate automated reports, and provide real-time browser protection.

## CERTIFICATIONS

---

- C, C++, Java — IIT Bombay & Others
- Ethical Hacking, Cyber Security, Bug Bounty Programs
- Android Security and Critical Infrastructure Protection

## SKILLS

---

- **Proficient:** Java, Python, JavaScript, Node.js, React, Cybersecurity Tools (Wireshark, Nmap, OWASP ZAP)
- **Familiar:** C, C++, Networking, Artificial Intelligence, Web Development
